BLAIRMORE. - ALBERTA

John D. Rockefeller would go broke if he should spend his entire income trying to prepare a better medicine than Chamberlain's Colic, Cholera and Diarrhoea Remedy for children, dysentery or bowel complaints. It is simply impossible, and so we advise everyone that has used it sold by dealers everywhere.

See the Davenport Cafe's ad on our editorial page. No better place in Blairmore to enjoy a short order.

It is believed around town that the miners' strike will not last long.

Harem Skirt Has Dangerous Rival

The appearance of the "harem skirt" which has created a mild sensation throughout the leading social centres, has a rival to contend with in the recent creation of the four-quarter skirt. The rival is a dangerous one and is considered to be an easier walking skirt than the harem. The designer of the four-quarter skirt has not attempted to obtain a trademark; instead of being slit in the front, it is slit on four sides thus dividing it into four quarters, from which it obtains its name. In a big way, it is said that the skirt looks very much like a ruptured balloon.

CHAIRMAN APPOINTED

Rev. Dr. C. W. Gordon Is Chosen of Minister of Labor-Arbitration Board

IS IN SESSION AT LETHBRIDGE.

Dr. Gordon Has Been a Very Successful Chairman on Other Boards

Hon. Mackenzie King, minister of labor, has received a joint telegram from the representatives of the parties concerned in the existing dispute in the coal fields of British Columbia and Alberta, says a press despatch from Ottawa, stating that they had met and agreed on asking him to name the chairman of the board of conciliation and investigation in this matter.

The minister accordingly telegraphed Rev. Dr. C. W. Gordon pastor of St. Andrew's church, Winnipeg, and popularly known as "Ralph Connor," the novelist, appointing him chairman of the board in question.

Dr. Gordon has been chosen because he has acted as chairman of one or two boards of conciliation with the very greatest satisfaction to both employers and employees, in particular, that in Winnipeg two years ago at the time of the threatened strike on the street railway, in which he was successful in bringing about an agreement between the parties.

The minister of labor expressed the hope that owing to Dr. Gordon's well-known qualities for fair play and square dealing and his broad and public sympathies, a termination of the strike would be brought about.

On Saturday last Rev. Dr. C. W. Gordon accepted the appointment offered him by the minister of labor, and left Winnipeg for Lethbridge on Sunday night, arriving at the latter place early Tuesday morning where he met Colin McLeod and A. J. Carter, the other members of the board.

The board of arbitration and investigation held its first meeting at Lethbridge on Tuesday when the organization work of the board was commenced.

Tennis Club Re-organized

The Blairmore Tennis club held its first meeting for the season on Monday evening. The meeting was held in the Union bank building. There were about twenty-five members present. The club was re-organized and the following officers were elected for the ensuing year: R. W. Coulthard, president; T. H. George, vice-president; O. Bellie, secretary-treasurer. An executive committee was appointed to procure suitable grounds and to have them put in a first class condition. The executive met on Tuesday evening but nothing definite was decided upon.

EGGS FOR HATCHING—Extra fine-bred Barred Rocks—\$1.00 per setting of 15. Apply to

MRS. ROBERGE, 13-4-4 McLaren's Mill.

Happenings in and Around Blairmore

C. Hiscocks and H. Perry spent Sunday at Pincher Creek.

Robert Lake, of Calgary, came to town on Monday evening.

The Old Man river is rising very fast and many wash-outs in this vicinity are expected.

Thomas Cyr loaded a car with hard firewood last week, which was consigned to Monarch, Alta.

W. Robson, of Hoamer, was a visitor to town on Monday. He left in the evening for Edmonton.

The splendid weather of the past week has enabled the builders to make good progress on the large opera house.

E. Morino is rushing with all speed the installation of the water works. He has now ninety men employed at this work.

Rev. J. F. Hunter went to Nanton on Saturday where he conducted special services on Sunday.

M. Osborne left on Sunday morning for Princeton, B. C., to help in the construction of the British Columbia Cement Co's plant there.

Church goes are hereby reminded that services are being held in the Presbyterian church every Sunday morning as well as in the evening.

F. W. Hodson, of Pincher Creek, came to town on Monday and returned on Tuesday to Pincher City, where he is installing water works for that village.

The smoker which was given in the Mercantile hall, on Saturday evening, by the Blairmore Baseball club, was a big success. They made about fifty dollars.

James Fleming desires through the columns of this paper to publicly thank all the friends who were so kind and attentive to him during his recent illness.

Rev. K. Kingston, of Frank, occupied the pulpit in the Baptist church here on Sunday morning last. F. M. Pinkney conducted the service in the evening.

We wish to remind our readers of the big auction sale of horse, cattle, farm implements, etc. which will be held at Cowley on Saturday next, by Carter & Eddy.

T. Heywood, blacksmith at the Rocky Mountain Cement Works, will resign from that position on the 15th of May to devote his whole time to his business at Passburg where he and H. Tye have started a blacksmith shop and shoeing forge. Mr. Heywood is a well-known cricket and football player of Calgary.

All members of Blairmore Lodge No. 68, I. O. O. F., all visiting brethren and all Daughters of Rebekah are requested to meet in the Odd Fellows hall, at 2 p. m., on Sunday next, preparatory to attending the anniversary service of the order at the Central Baptist church where the Noble Grand, Rev. Bro. J. F. Hunter will address the brethren, the service to commence at 8.30.

W. T. Watson, C. P. R. agent at Hoamer, and brother of S. J. Watson, was in Blairmore on Monday. Mr. Watson has been chosen to represent the Crow's Nest Pass from Kootenay Landing to Medicine Hat, and Calgary at a convention of C. P. R. agents and operators which will be held at

WILL BUILD MORE HOUSES

West Canadian Collieries Will Erect Twelve More Beautiful Dwellings on Their Property

AT WEST END OF BLAIRMORE.

Most Desirable Place for Residence—Lots of Room for Blairmore to Expand

The West Canadian Collieries have about twenty-five men and several teams at work clearing their property at the west end of Blairmore. Large trees are being cut down and the stumps blown out, the land cleared, good wide streets made and everything possible is being done by the company to make their new sub-division a most desirable place to live in.

The West Canadian Collieries have already erected ten very pretty, commodious and substantial dwellings on their property. It is an ideal place for a residence and many are anxious to reside there. This is proven by the fact that so eager were those ten dwellings sought after by desirable citizens that those buildings were completed, people were anxious and ready to move into them.

So great has been the demand for dwellings in the new sub-division, as well as in other parts of Blairmore, that the West Canadian Collieries have decided to build twelve more residences equally as good and as large as those already erected there. Plans and specifications are now being prepared and the advertising for tenders for this work will shortly take place.

Here and There

The C. P. R. hotel at Banff will re-open on May 15.

Sir Donald Mann, C. N. R. magistrate, is reported to be seriously ill.

Bob Edwards has returned to Calgary where he will resume the publication of the Calgary Eye Opener.

Contracts will shortly be let by the C. P. R. for two steamships for the Pacific coast trade of fifteen thousand tons and eighteen knots.

Five thousand negroes will be in British Columbia before the end of this summer, if the scheme of Col. Tom J. Harris, of Sapulpa, Okla., materializes.

Because of the steady increasing demand for their products in the Dominion of Canada, The Yale & Towne Mfg. Co., of New York, makers of Yale products, have decided to establish a branch plant in Canada and have selected a site in the city of St. Catharines, Ont., where they will commence immediately the erection of several large buildings.

Diarrhoea should be cured without loss of time by a medicine which like Chamberlain's Colic, Cholera and Diarrhoea Remedy not only cures promptly but produces no unpleasant and safe to take. Sold by dealers everywhere.

Toronto early in May. Mr. Watson left on the evening train for Calgary where he will look over the situation there before proceeding to Toronto.

Incompetent Correspondents

We admire very much the
fairmindedness of the Leth-
bridge Herald in contradicting
a most lying and damaging re-
port sent to that paper by
some bold person who chooses
to make Blairmore his place of
abode for the present. That
paper gave our last week's first
editorial article a prominent
place in its issue of Saturday
last.

Of course, no reasonable per-
son would blame the news-
papers directly for the first
publication of such false re-
ports. Considerable care is
being taken and great efforts
are being made by the dailies
to get reliable correspondents
in the different towns in which
they have a large circulation.
In most cases this end is splen-
didly accomplished and the
small towns get free advertis-
ing, and are consequently help-
ed by being well and fairly re-
ported in the daily papers, in
addition to the help given the
town by its own weekly publi-
cation.

Notwithstanding all this, a
pessimist now and then makes
an attempt on the journalistic
arena; a black sheep gets into
the fold; fabulous reports are
sent to the dailies; and the
Ananias club welcomes an
outside member. We are sorry
that right in Blairmore there
is one such person who with an
ultra motive that is very evi-
dent, sends out garbled reports,
attempts to knock the town
and to defame its fair name.
Such a person should only be
given until the next train to
seek pastures new and to ply
his goose feather in communi-
ties that would far more cor-
respond with his writings.

Editorial Notes

We rise to ask, what is being
done about incorporation?

The appointment by Hon. W.
L. King of Rev. Dr. C. W.
Gordon as a member of the
conciliation board meets with
popular approval.

It has not yet been decided
upon to run a free bus during
the summer season, from the
first bridge at the east end of
Blairmore to the new tennis
courts.

The burning sun, with won-
drous power, shines down
upon the mountains.

The snow yields to that fiery
ball; gives water to all
fountains.

A pole war is brewing on the
Atlantic. If this materializes,
the C. P. R. will be prepared to
fight her interest, as she was in
1908-09 when the same con-
dition of things prevailed on
the Pacific.

Though the water in the
river is increasing very
fast,
Grave consequences will re-
sult if you dare to take a
bath.

Now, while the strike is on,
Blairmore should take advan-
tage of the splendid oppor-
tunity of having the place in-
corporated into a town. No
person, who may be opposed to
incorporation, has yet taken
the trouble to express his views
through the press, and only a
very few persons have spoken
against it in public. Wake up,
ye Blairmore people!

Volume I, No. 1 of the Pro-
vincial Standard, a twelve-page
weekly newspaper published in
Calgary, by The Standard
Printing & Publishing Co., with
Harley E. Whitebread as gen-
eral manager, has just reached
this office. This new journal is
well and ably written, full of
live and interesting articles, the
ads., of which there are many,
are mechanically constructed
and very attractive, while the
paper used is of a high grade.
We wish this new baby success
along the troubled waters of
journalism.

Fame's Foolish Frenzy

A Brake in the District Ledger tries
His swelling heart to vent
In a piece of mis-made poetry
With "a day on 'er" intent.
He took a dose of William's Pills
Which he'd been advertising,
And fermentation soon set in
And out the brake went.
One only, ye could give space and hear
This quacking bird a-blarney!
Don't make a little water rage
Or spoil its mis-called "writing."
It takes a head, to make a rhyme,
That's void of success matter,
And the shop that's sold his railing sets
Dear readers in a clatter.
He feels a bit of warmly blood
Reminding in his veins
And calls himself an "Editorial"
"I guess no more remains!"
He's roared upon the galaxy file
Where fish-pond made him swim;
His days were days of chummers
And all his journey's run.
Bravo! the last breath's leaving him -
He's told he'd make a poet -
An only chance to earn a name
And let his readers know!
"The Enterprise" he comes to join,
But fails to make his mark;
His verses pieces of poetry
Is just a blamed fool's bark.
Shake off dull sloth, and joyful rise,
The day of self-pride's done;
Forget that futile trial to hit
And try another one.
No man succeeds at first attempt -
The whole else world knows that;
Don't take a gun to write a poem.
Till you know what you are at.

What Others Think

Reciprocity will never know
what trouble really is, until it is
turned over to the tender mercies
of the two Senates - Montreal Star.

In a debate in Los Angeles to
decide whether baseball or poker
was the national game of the
United States the grass diamond
won on a close decision - Vancon-
ver Province.

According to Professor Thomas
C. Chamberlain, of Chicago univer-
sity, the world is now 400,000,000
years old. We consider that when
it reaches its 500,000,000th year
some sort of celebration ought to
take place - Punch.

Rev. C. W. Gordon succeeded
very well as chairman of the board
of conciliation before. He is a
broad-minded, fair man, who has
a keen sense of what is right and
fair, and should be a very accept-
able chairman. - Calgary Albertan.

We have been hearing of a lot
of toys and rumpus in Congress
over the reciprocity measure, but
the actual count of noses shows
that practically every congress-
man is in favor of the agreement
as it stands. - Calgary News Tele-
gram.

Nobody who heard Mr. Haw-
thorne wait a few years ago orate
about the time to come when the
red flag of Socialism would be
floating from the capital buildings
at Victoria, could have imagined
him taming down to a respectable
capitalist, with greatly modified
expressions, if not opinions, on the
subject of Socialism. - B. C. Satur-
day Sunset, Vancouver.

The present-day demand for

The "2" Big Stores

The General Run of Paints.

are first-rate for ordinary purposes.
But we claim that our paints are
above the general run, and will out-
last the others.
If you want paints that are really
good, our store is the place to get
them. We have them in all the
colors in general use, and when once
you see our paints, you'll feel satis-
fied that they are the best.
A NECESSARY
element to make your house, fence
or barn look neat and attractive is to
give it a coat or two of paint occa-
sionally. Buy some now. You'll
need it sooner or later. We charge
very moderate prices for it.

Watch our "ad" and window each week. It will pay you.

universal publicity, for "turning
on the light," not only when light
is needed, but in every nook and
cranny of public or private life, in
every corner of the world, is not so
much the "privilege" of the modern
newspaper as the really serious
burden under which it staggers.
After all, the newspaper, like the
individual, has to meet its own
problems and make its own repu-
tation, not by any imagined privi-
lege but by the impression of
character, good or bad, which it
builds up from day to day. - Phila-
delphia Public Ledger.

Hon Frank Oliver got a crowded
house in Edmonton to hear him
defend the reciprocity treaty. Mr.
Oliver should come to Vancouver
and defend the fool system of im-
migration inspection in this port
whereby uniformed aliens are per-
mitted to question Canadians in
their own port and by which a
uniformed Canadian ruffian in
Seattle insults unescorted women
coming to Vancouver. Hon. Frank
Oliver is responsible for that sys-
tem and there are quite a few
people in Vancouver who would
like a chance to tell him what they
think of it. - B. C. Saturday Sun-
set, Vancouver.

THE BEST REMEDY

For Women—Lydia E. Pinkham's Vegetable Compound

Belleville, Ont.—"I was so weak and worn out from a female weakness that I concluded to try Lydia E. Pinkham's Vegetable Compound. I took several bottles of it and gained strength so rapidly that it seemed to make a new woman of me. I can do as good a day's work as I ever did. I sincerely bless the day that I made up my mind to take your medicine for female weakness and I am exceedingly grateful to you for your kind letters, as I certainly profited by them. I give you permission to publish this any time you wish."

Mrs. ALBERT WICKERT, Belleville, Ontario, Canada.

Women everywhere should remember that there is no other remedy known to medicine that will cure female weakness and so successfully carry women through the change of life as Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs.

For 30 years it has been curing women from the worst forms of female trouble—inflammation, ulceration, displacements, fibroid tumors, irregularities, periodic pains, backache, and nervous prostration.

If you want special advice write for it. Mrs. Pinkham, Lynn, Mass., is free and always helpful.

The Master Hand
"Did you ever read any funny parodies on Kipling?"
"Yes."
"Who were they by?"
"Kipling."

Some persons are more susceptible to colds than others. The danger elements of the pulmonary organs from the slightest cold. These should always have at hand a bottle of Kipling's Antiseptic Balm. This balm is a cure for colds, catarrhs and inflammation of the lungs. It will effect a cure no matter how severe the cold may be. You cannot afford to keep out a remedy like Kipling's, for it is the best.

Every man's soul has a natural affinity for whatever is beautiful and holy.

Shiloh's Cure
quickly stops coughs, cures colds, breaks the throat and relieves the chest.

Magistrate—"You say you are innocent. How do you explain the fact that you were found near the scene of the robbery with the stolen property in your hands?"
"That's what's puzzling" me, too, your worship."

Cured Eczema and Dandruff

"I am pleased to inform you that I have been cured by Cuticura Soap and Ointment. Since I was a boy I have suffered with dandruff, not only from the itching and smarting, but also from the unsightly appearance in a scaly form over my head. I had to break it out by my fingers and use every kind of preparation supposed to cure dandruff, but it only made it worse. I used Cuticura Soap and Ointment, and in a few days the dandruff increased, even to the point of falling out and the scalp was raw. From this time I used Cuticura Soap and Ointment, and in a few days the dandruff was cured. I had the most gratifying results for I had used only one box of Cuticura Soap and a single tube of Cuticura Ointment and a single bottle of Cuticura Soap when I was cured, the ointment and soap were gone and my head perfectly clear. I am sure you can do as long as I live no other soap than Cuticura. I will also add that I will always use Cuticura Ointment as a dressing for the hair. I feel that you should know of my cure and if you desire you may use this as a true testimonial which comes from a sufferer who is happy to tell any one of my experience in order to assist those who may be suffering from the same." (Signed) J. A. CROOK, General Commission Merchant, 50 Pearl St., New York.

Cuticura Soap and Ointment are the most economical treatment for dandruff and eczema. As in this case, a single box of Cuticura Soap and a single tube of Cuticura Ointment, and a single bottle of Cuticura Soap, cured the patient. Cuticura Soap and Ointment are sold by Foster Drug & Chem. Corp., Boston, U.S.A., for all druggists. Send for a list of agents and sample bottles.

Cuticura Ointment
Cures Eczema, Dandruff, Itch, and all skin diseases.

W. N. U., No. 341.

WOMEN HIDE SECRET.

London Doctor Declares Drinking Is Fast Growing.

B. Murray Leslie, in the current number of National Health, makes the startling assertion that there is far more secret drinking among upper and middle-class women than is generally known. The consumption of whisky, brandy and even gin and Cognac is far too common. In the industrial centres, this Harley street physician points out, women are drinking more than ever. In London, Glasgow and Dublin the public houses can be seen crowded with women, and the Irish capital is notorious for the large number of quite young girls frequently public bars.

On the other hand, when a woman of the upper classes becomes addicted to alcohol she nearly always drinks in secret. She soon becomes such an adept in cunning and dissimulation that she is often enabled to carry on the practice for years without any of her friends being aware of the fact.

A most cunning secret drinker would be the old maid or married woman without children. Loneliness and monotony, with no outlet for the expression of the natural emotions of joy and love, are the main causes ascribed by the doctor for the increasing incidence in women.

Among the effects of drinking on women he remarks on the loss of power and self-control and the blurring of the sense of right and wrong. In conclusion, Dr. Murray Leslie says that the long struggle with the drinking woman becomes a creature of impulse, no longer controlled by judgment. Her life, he says, is a series of stories and she violates the proprieties to put it mildly, because their power of control has ceased to exist.

HONOR FOR CHURCHILL.

Militant Englishman Sent Medal to the Home Secretary.

Some people have an idea that the English lack a sense of humor, and seems to be certain that they do fail to appreciate the finer brands of fun. But they have their own idea about a joke, and it is times this idea is really funny.

One of the successful jokes about which London has recently laughed was at the expense of Winston Churchill, the Home Secretary. He was present on the day that the police had the long struggle with the anarchists in the east end, a struggle that is now facetiously referred to as the "Battle of Houndsditch."

Some of the militant admirers of the Home Secretary have prepared a medal which has been sent to the official. It commemorates his valor in spilling valuable blood in the desperate fighting at Houndsditch.

The reverse of the medal has a picture of Mr. Churchill, shown in the act of watching the effect of the shot fired by the military at the anarchists in the east end. The photograph was made when Mr. Churchill did not know a camera was near.

The inscription sent with the medal says that the donor is "founded at the battle of Houndsditch, in which 1,500 policemen, and a company of Scott Guards were employed in destroying two aliens." The suggestion was that Mr. Churchill write a pamphlet to be called "How I Escaped From Houndsditch."

The Incomparable Durbur.
Since time immemorial the various royal courts of the world have been the scenes of fetes and banquets of marvelous splendor, which have been given at great expense, but nowhere and at no time have any of these events compared in point of wealth and the jewels and gay colors displayed with the Durbur of India.

A Durbur is usually in the nature of a reception by the Governor-General to the Indian princes and potentates, who gather in the capital city, each trying to outdo the other in the display of jewels and costly garments. Usually each has a retinue of sub-officials and servants with him, all clothed in varicolored, jewel-studded costumes. It is customary for these princes to use elephants to carry them from place to place, each surrounded by a hound, a sort of basket-like affair in which the riders are seated. From this hound are hung gorgeous trappings of rich velvet embroidered in gold and set with jewels. No Durbur is complete without a procession of these splendidly bedecked animals, each ridden by its owner, and no more gorgeous event can be pictured.

Made Dumas Retract.
The elder Dumas was once sued for stating in one of his novels, "Le Route de Varennes," that the capture of Louis XVI. and Marie Antoinette at Varennes by the revolutionaries was due to the action of the Chevalier de Fretonne in shutting the door of his house on the fugitives.

A grandson of the chevalier considered this an aspersion on his ancestor's chivalry and proved in court that the statement was untrue. An order was issued compelling Dumas' publisher to call in all copies of the novel and to issue within one month a fresh edition with a note that the Chevalier de Fretonne placed his house at the disposal of the royal fugitives.

The World's Southernmost City.
The capital of the territory of Magellan, belonging to Chile, is Punta Arenas, the southernmost city in the world, with a population of about 12,000, good wharfs and stores, paved streets and extensive traffic. All vessels going through the strait stop at Punta Arenas, and much wool is shipped from there. It is a free port, has a wireless telegraph station, is a station for the Chilean navy and does a large business in the coaling of steamers. It is, in fact, a crossroad station between the east and the west.

Cycling Popular in England.
Bicycling is so popular in England that there are 1,300 amateurs racing under the laws of the Amateur Athletic Association.

DISCOUNT HARROWS

Your Choice of Four Kinds Disc Harrows, also Diamond'Clip, Lever and Boss Harrows. See Dealer.

Teacher—Tommy, do you know, "How doth the little busy bee?"
Tommy—No, I only know he doth it!

NEW STRENGTH IN THE SPRING

NATURE NEEDS AID IN MAKING NEW, HEALTH GIVING BLOOD

In the spring the system needs toning up. To be healthy and strong you must have new blood, just as the trees must have new sap to renew their vitality. Nature demands it, and without this new blood you will feel weak and languid—you may have twinges of rheumatism or the sharp stabbing pains of neuralgia. Often there are disgusting pimples or eruptions on the skin. In other cases there is merely a feeling of tiredness and a variable appetite. Any of these are signs that the blood is out of order—that the indoor life of winter has lessened your vitality. What is needed to put you right is a tonic and in all the world of medicine there is no tonic can equal Dr. Williams' Pink Pills. These pills actually make new, rich, red blood—your greatest need in the spring. This new blood enters the system and enters the skin and makes weak, easily tired men, women and children, bright, strong and young. You can prove this by your neighbors for there is not a nook or corner in this great land where some man, woman or child has not been made well by Dr. Williams' Pink Pills.

When making a meat loaf, place three hard-boiled eggs in the middle, end to end. When the meat is cut a slice of egg is in the center of each piece. It makes a very attractive uncheon dish.

Yarmouth, N.S., June 2, 1908.—"I have been bothered with Rheumatism for the past year and have taken a good many kinds of medicine and with no relief for it. I think Dr. Williams' Pink Pills a boon to every weak person."

Sold by all medicine dealers or by mail, post paid, at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

The doctors can make a man's heart beat hours after he is dead. It would be much better if they could make people's hearts beat while their owners are living.

CURED THE WIFE AND HUSBAND TOO

GREAT WORK DONE BY DODD'S KIDNEY PILLS IN ONE QUEBEC FAMILY

Thomas Lauriault had Kidney Disease and his Wife Bright's Disease and Dodd's Kidney Pills Made Them Both Well.

Luc Goyanmont, Que., (Special).—There is a world interest in the simple story of Madame Thomas Lauriault of this place. In her own words it is as follows: "Dodd's Kidney Pills cured my husband of Bright's Disease. I recommend Dodd's Kidney Pills to all who suffer from Kidney or Bright's Disease."

This is a splendid example of the grand work Dodd's Kidney Pills are doing among the plain people of Canada. Kidney disease is the common ailment of all climates and seasons, and it is a disease that is often the first part of the body to be worn and tear of heavy work.

When the kidneys go wrong the blood goes wrong, and the whole body suffers. Rheumatism, Dropsy, Diabetes and Bright's Disease are the usual results. Dodd's Kidney Pills cure these by simply curing the kidneys.

Feminine Weakness
A very homely clerkman was severely battered in a railroad wreck, in which he suffered the loss of a foot.

One day, soon after marrying a beautiful woman, the ill-used minister met an old friend on the street, who banteringly asked him in the words of a pretty girl came to marry him.

"Oh, ladies like remnants!" was the cheerful reply.

"Charley, dear," said young Mrs. Hopkins, "do you think you and I will ever see serious trouble with the Japanese?"

"No," replied he husband wearily; "but sometimes we happen to get a Japanese cook."—Washington Star.

"The tips you give me on the market are always wrong," said Mr. Lamm.

"Well," replied Mr. Chillinerve, "if you know they're wrong why don't you make a fortune playing them the other way?"—Louisville Courier-Journal.

The Making of Books
First Author—Has Scribner returned from abroad?
Second Author—Yes. While there he was introduced to the car and had a three minutes talk with him.

First Author—What is he doing since he got back?
Second Author—He's at work now on a three-volume work on "The Nicholas I. Know."

She—Why was the engagement broken off?
He—"Well, after taking the girl to dinner, I was going to give her a costly presents and a birthday gift of a motor car, her father accused me of amusing himself at her expense."

I consider MINARD'S LINIMENT
I got my foot badly jammed lately. I bathed it with MINARD'S LINIMENT, and it was as well as ever next day.

Yours very truly,
E. G. McMULLEN.

Minard's Liniment Cures Burns, etc.

Stealing much money seems to be able to ruin a man more distinction than saving less.

Protect the child from the ravages of worms by using Mother Grace's Worm Expeller. It is a standard remedy, and years of use have enhanced its reputation.

"Quer, wasn't it? It was at the mouth of this river—"
"Yes?"
"We ran into the teeth of the gale."

Catarrh Cannot Be Cured
With LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarrh is a local disease, and it is in order to cure it you must take internal remedies. Catarrh Cures are taken internally, and act directly upon the blood and mucous membranes of the system, and it is not a matter of time, but of degree, how long it will take to cure. It is the only remedy that is so powerful, and it is the only remedy that is so safe.

"I thought I would write you a few lines to let you know how thankful I feel for the relief they gave me, and would advise all sufferers from Rheumatism to get Dr. Williams' Pink Pills."

In Dread of Something

You Can Scarcely Tell What It May Be Hysteria, Insanity, Nervous Collapse.

DR. CHASE'S NERVE FOOD

When the nervous system breaks down you live in constant dread of something terrible about to happen. Physical suffering cannot be compared to the mental agonies of the nervous wreck who fears that his mind may give way or that his body may be paralyzed.

In this condition you must suffer alone for friends cannot understand or sympathize with you. They tell you to cheer up or that it is only imagination.

You can only throw off this depression when the nerve cells are restored to health by such treatment as Dr. Chase's Nerve Food. Your digestive system has failed to supply proper nourishment to the nerves and you are compelled to seek aid from other sources.

It will take some patience and persistent treatment, but there is no way by which you can so certainly restore health and vigor as by the use of Dr. Chase's Nerve Food.

The best time to restore the nervous system is long before such a critical condition is reached. Such symptoms as headaches, sleeplessness, nervous indigestion, muscular weakness, loss of energy, failure of memory and power of concentration, irritability and discouragement tell of a failure of the nervous system and warn you of the approach of serious trouble.

Dr. Chase's Nerve Food, 50 cents a box, 6 boxes for \$2.50; all dealers, or Edimondson, Bates & Co., Toronto.

The beauty about day dreams is that you can remember 'em!

Shiloh's Cure
quickly stops coughs, cures colds, breaks the throat and relieves the chest.

Sutor—"I would like to see the photo of the lady with the \$500,000."

Matrimonial Agent—"We don't show photos with the large dowries."—Flegende Blätter.

The End of His Rope

A Story of a Fortune Hunter in the Swiss Alps
By F. A. MITCHEL
Copyright © 1911, The Press Association, Inc.

Intervenor, in the Swiss Alps, is a central point for tourists for making excursions either into the neighboring valleys or to the mountains. The town, which is simply a cluster of hotels with a casino, built on a plain between two lakes, deriving its name from its location, each lake about ten or a dozen miles long and about a mile wide. To the south of these lakes lies the peak of the Bernese Alps—the Eiger, Jungfrau, Monch and others. From Interlaken a cog railway carries tourists up steep inclines to Grindelwald, Scheidegg, and thence down to Lauterbrunnen. From Lauterbrunnen one may be swung up by cable several thousand feet to Murren, where a new view can be obtained of the surrounding group of mountain tops.

One summer some tourists started on the cog railway for Scheidegg, from whence the men of the party intended to attempt to climb the Jungfrau. The cog railway now extends farther up the mountain, but at that time one could travel by rail no farther than Scheidegg. In this party were Miss Della Denton of New York and Mr. Archie Pendleton of Chicago. Miss Denton was an actress, while Mr. Pendleton was an American lawyer of moderate means who had but recently been admitted to the bar.

Touring in Europe affords every facility for love-making, and Pendleton had availed himself of the opportunity to woo Miss Denton. He seemed about to secure the prize when a young Britisher, heir to an earldom, came upon the scene, and became a tie between him and the American. Pendleton had the mortification and disappointment to see his suit held up by nothing more or less than a title. Worse than this, from the time Lord Boyingham entered the contest for Miss Denton's affections, the attitude of the party should put up at one of them while the men made the attempt upon the mountain. There were three men intending to go up, but one of them, becoming fearful of his heart's action in the thin air, was deterred and declined not to risk a higher altitude. This left Boyingham and Pendleton the only ones to go except the guides. There were two guides, armed with axes and alpenstocks, one for each end of the "wide procession."

When the party left their friends standing on the porch of the hotel both Boyingham and Pendleton looked at Miss Denton as they departed. Boyingham was elated, Pendleton depressed, for the smile she bestowed on the former had an evident meaning in it, while she looked at Pendleton conveyed nothing more than good will. The men moved off, encouraged by a cheer from those who remained, and went on their way, returning in their path taking them around the side of the first mountain.

It was 10 o'clock when the climbers started, and the day was fine. Through a telescope of the porch they were watched, being occasionally seen like a mouse in a field, or a deer in a forest. About noon the weather began to abate, with frequent snow flurries, and they were visible no longer.

It was nearly night when two of the party, Lord Boyingham and one of the guides, Hans Dyckman, returned, their bearded faces and agitation denoting there had been an accident. "Where are the others?" asked a clamor of voices in tones of dread. "Lost, I fear," said Boyingham.

At that moment Della Denton joined those about the returned climbers and, bearing Boyingham's words, staggered. "What has happened?" asked all at once.

"Let them, Hans," said Boyingham. "The snow covered our way," said Hans, "and getting up the mountain. We were crossing a ridge. Brouwer was in advance, with Mr. Pendleton next, his lordship third and I fourth, all bound together by the rope. Brouwer and Mr. Pendleton had crossed and were cutting steps in the ice on the other side. Something, we know not what, gave way in the other end, and we felt a jerk on the rope. It had broken between Brouwer and Mr. Pendleton. His lordship was on the edge of the divide. Presently there was another jerk. Mr. Pendleton went down, and his lordship fell back, I catching him in my arms."

"But the others?" exclaimed the excited listeners. "How far did they fall?"

"That we don't know," replied the guide. "It was snowing, and we could not see a dozen yards. We concluded to return for ropes, go back and as soon as it is light tomorrow start an investigation. They have provisions and flasks of liquor, and if they are not killed we may save them."

the end of the rope that had been secured between Boyingham and Pendleton and scintillated in the air. Presently he dropped it and went away.

"Why did you examine that rope?" asked a guest.

"To see if it had been broken," "Well?"

"It was broken. The end was frayed."

About midnight a party, provided with such paraphernalia as were necessary for their purpose, made ready to start in quest of the missing guide and Pendleton. Lord Boyingham decided, however, that there was no use in attempting to reach them; that he had looked down into a crevasse several hundred feet deep, into which he was sure they had fallen. He declined to go back with the party, making an excuse that he had been so "cut up" by the accident and the loss of the two men that he would be of no use in the rescue. Since no one was wanted in the party who could not be rescued, he was the best for him to remain in the hotel.

The party started about 1 o'clock. They could travel over a known path all nearly dark, but they were not then near the scene of the accident as soon as it was light enough to see to what depths the men had fallen. Fortunately the weather had changed, and shortly after 2 o'clock a gray streak appeared in the cloudless east. The party consisted of a Mr. Bowers, an American lawyer, and a young man, where the excursionists had put up, two porters and Dyckman leading the way.

About half past 2 they reached the ridge where the accident had occurred, and Bowers, taking the advance, climbed it, sitting on it with a leg on either side. Looked down, he saw that the tourists must have fallen into a gap, but how deep he was not sure. The rope of the party, being informed of what he was about to do, all advanced, he descending to an icy ledge not far below. The men in falling must have slipped, and, unable to stop themselves, had slid into the gap.

When all had crossed the last man threw the coils of rope down, and Bowers volunteered to be lowered to discover whether the men could be found and whether they were dead or alive. A signal was given, and his body, and a code of signals having been arranged, he was let down. When he had gone some forty feet, the rope slackened, it was evident that he had struck bottom. He was then heard to call, and a faint response came up. He signalled that he was all right, and the party, said that the gap was filled with soft snow; that he had called and received an answer. When being raised, he looked for a moment at the voice and saw him some fifty feet away. The point from which he had been lowered being altered to meet the new conditions, he went down again with another rope. Presently a signal was given on each end, and Bowers and Pendleton were both hauled up. Brouwer was high gone, but was able to point out where Pendleton could be found, the latter having come after the fall.

Bowers again went down with an extra rope and struck Pendleton lying apparently unconscious, though it does not seem to have been immediately obvious that he would not have seen him, so deeply buried was he in the snow. Then Bowers returned, and Pendleton was both drawn up. Pendleton showed no signs of life. But glass being placed over his mouth showed moisture, and the party, going to work on him, was able to pour down liquor at the same time, finally revived him.

Neither of the men had been injured by their fall into the crevasse. They were on the eve of perishing by cold. As soon as they were able to proceed the party descended to Scheidegg.

Great was the excitement when the two men who had been considered lost appeared walking with their rescuers down the mountain. When 10 o'clock when the climbers started, and the day was fine. Through a telescope of the porch they were watched, being occasionally seen like a mouse in a field, or a deer in a forest. About noon the weather began to abate, with frequent snow flurries, and they were visible no longer.

It was nearly night when two of the party, Lord Boyingham and one of the guides, Hans Dyckman, returned, their bearded faces and agitation denoting there had been an accident. "Where are the others?" asked a clamor of voices in tones of dread. "Lost, I fear," said Boyingham.

At that moment Della Denton joined those about the returned climbers and, bearing Boyingham's words, staggered. "What has happened?" asked all at once.

"Let them, Hans," said Boyingham. "The snow covered our way," said Hans, "and getting up the mountain. We were crossing a ridge. DEVELOPING DRAFTERS.

Sound Mares as Necessary as Pure Blood Stallions.

It requires skill and a liberal system of feeding to grow and develop a high grade draft horse for market, writes W. C. Goss, of the Canadian Gentleman. The actual difference in cost between growing the right kind and mongrel is so very small that it is only fair to the public to state the reasons why a lot of old nondescript mares and depend on the good qualities of the stallion to correct their natural weakness and deformities in the progeny. The man who knows how to care for and feed his farm teams so that they will keep in good flesh and vigorous condition can afford to invest a few hundred dollars in good brood mares and grow horses for market. The farmer who is in a position to market one of two good brood mares each year has an additional income that is not a much easier and more certain source than many other branches of stock feeding.

After selecting a few well bred mares that are free from all hereditary disease and deformities, and one of the leading draft breeds, and one that is not only a good individual, but a true type and representative of his breed. The stallion chosen should weigh to exceed 5000 pounds more than the mare with which he is to be mated. In all cases of stock breeding we must take nature abhorre a union of widely different types and that it will usually produce better results to mate the mare with stallions somewhat of the same type and resembling them in form and general characteristics.

While some farmers are beginning to appreciate the importance of using sound, pure bred stallions, the equal importance of using sound mares is not yet generally understood. When a mare is really sound, she will produce longer is fit for anything else she often is set aside for breeding purposes, and so long as this absurd and ruinous policy persists the industry will be kept in the prevalence of unsound horses on our farms.

The success achieved in the breeding of Clydesdale horses in Canada serves as a good example of what can be accomplished by persistency and expert breeding. The pedigree of the horse of the Dominion's population has been partial to the Clydesdale, bred and conversant with its good qualities and utility; hence imported Clydesdale stallions.

The Shire breed of draft horses has been the most popular and successful among American horse breeders. The strong muscular type characteristic of the breed has proved of vast utility in producing heavy draft horses. The stallion shown above is owned by Mr. J. H. Goss, of Illinois. He was the first prize stallion at the Illinois state fair last fall.

One of the best character have been largely employed in the breeding operations of that country since the year 1840. Practically speaking, no alien crosses have been made, and the average farmer has been capable of selecting suitable mares and of adequate care in developing their progeny. The result is that Canada has but one type of draft horse, and it is a good one, showing a high degree of excellence in all of the breed characteristics of the pure bred Clydesdale.

In the Feed Lot. Have the feed lot located on a well drained slope, to the south of some windbreak, such as a grove of trees, a long shed or on the lee side of some building. The feed lot should be all of the plowing winds, but affords a spot where the sunshine will wield its most potent influence.

It is advisable to clean up all the refuse around the racks and manure once a day, else it soon freezes there, making it necessary to leave it in the lot until spring, which not only causes more and more harder labor, but establishes conditions that turn the feed lot into a perfect bog walkway to be waded through when spring thawing sets in.—Farm and Fireside.

Slage For Horses. Slage cannot be recommended for general feeding to horses of any kind. Some have reported gratifying results from its use, but others have killed their horses even with the first feed of it. It is generally suspected that in these unfortunate cases the slage was not of first class quality, but as there is no assurance that slage will not occasionally contain some motley spots every feed should be cautious in dealing with it out to horses. Horses are easily injured than cattle by moldy feed.

Sunlight Good For Cows. An open shed in the corner of the barnyard is not a dairy barn, but it can be used to good advantage during the dry sunny days if the north and west sides are wind proof.

Sheep Easy to Handle. Sheep require no more attention than cattle and less than swine. The occasional farmer who keeps a few sheep should not think of getting along without them.

Sheep Easy to Handle. Sheep require no more attention than cattle and less than swine. The occasional farmer who keeps a few sheep should not think of getting along without them.

My Lady's Mirror

Here Are the Latest Beauty Stunts. Look in the mirror every morning and think, "How well I am looking!" This is the "beauty thought."

Use almond meal instead of soap for washing the face and give your face a cooling oil as for eye occasionally. Close your mouth when you sleep and avoid yawning hollows behind your ears.

Sleep on your back and do not use a pillow. Sleeping on the side causes puffing under the eyes.

Keep your eyelids from sagging pinch them every day.

Give your skin regular meals like you have yourself—skin food of cold cream or something similar—and keep away wrinkles.

Put cold cream on your scrawny elbows and they will soon get fat and rosy.

Never say a word with an N in it unless you follow it with a Z, because N sounds like a snore in the throat. Z reminds them out again.

Pinch the upper eyelid gently toward the nose and back again twice every night and your eyes will not stick back in your head.

Dry meals are the only hope of fat women for reducing.

Use from three to six eggs for washing the hair.

Exercise Waist Muscles. Ten minutes given in the morning to manual work before putting on stays ably keeps the waist and the ability of muscles there enables the dancer to be graceful and at the same time keeps her slender.

So called "kicking" of professional skirt dancers is done from the hips. Women untrained in physical culture do not begin to work the muscles and cords about their hips and waist as much as they should, and in that fact lies the cause of increasing fatness among middle age women.

It is not well to try to bend from the hips while wearing long stays, and indeed, a long stay is a quarter of a century ago, and is a relic of the past.

Any woman who has seen skirt dancing will understand that the beautiful posing of the dancer is done entirely from the waist, and the flexibility of muscles there enables the dancer to be graceful and at the same time keeps her slender.

UNDERDRESSED GENIUSES.

Physical Possession of Some Men of Great Mental Ability.

There are people who contend that genius is generally obtained in the person of men of few inches. These have no doubt declared that great height and genius are incompatible.

It was perhaps the chief argument of these views, but other men of note have been in accord with such opinion.

In support of this argument Napoleon the First, Alexander the Great, Edgar Allan Poe, Alexander Pope, Nelson and Blake have been cited. The list of men of undoubted genius who have been short of stature, some indeed almost dwarfs, is long.

It is also a noteworthy fact that many of the really very great men have been not only small but diseased and deformed. For instance, Julius Caesar, who may be classed among the short men, was a epileptic. Napoleon suffered from epilepsy. Alexander the Great and Edgar Allan Poe were dipsomaniacs. Pope was grievously afflicted with dropsy.

Byron, although about average height, was congenitally lame. Nelson's stature was closely fitted to him and it would be possible to tabulate among men of genius of the first rank some of the most famous under the average stature and afflicted with bodily defects.

Popular Science Monthly. Chas. Kaseel attempts to overthrow the popular belief that great minds and small bodies are incompatible. Kaseel looked through biographies and concluded as a result of his personal knowledge that the average European eminent men have been of considerable height.

He also disposes of the theory that the average stature of men of this continent is about 5 feet 8 inches. Great Britain has the average height of the Latin race of Europe is far below the standard. But taking the average height of men 5 feet 8 inches, Kaseel makes out a goodly list of very eminent men who have exceeded the height.

Of the lives of 250 distinguished men examined thus, those of 100 supplied the average height of the Latin race of Europe is far below the standard. But taking the average height of men 5 feet 8 inches, Kaseel makes out a goodly list of very eminent men who have exceeded the height.

He also disposes of the theory that the average stature of men of this continent is about 5 feet 8 inches. Great Britain has the average height of the Latin race of Europe is far below the standard. BROWN SWISS BREED OF DAIRY CATTLE

It is sometimes claimed that the dairy quality of the Brown Swiss breed has been improved and the breed "ruined" by the crossbreeding of those who have cultivated this breed for the last thirty years, writes E. M. Barton in *Hoards Dairyman*. The method of "ruining" has consisted in feeding the calves less liberally while they are growing and in breeding the heifers about a year earlier than in the Swiss practice, thus making them lighter and leaner than they would be if they had had the usual care that is given to young cattle in Switzerland. By following this practice for two or three generations the normal weight of the cows is reduced two or three hundred pounds, and this is done without spoiling the cows for milking purposes.

Whether this practice takes something from the milk and butter quality and whether it takes of something from the useful life of the cow is hard to prove one way or the other, but I hold to the theory that, the breed being of the highest dairy quality at the same time of considerable weight, as it has been bred for hundreds of generations in Switzerland, the chances of "ruining" it by the crossbreeding are small, which has gone on in this country is in reality a stunting process and a lowering of the quality of the milk and butter.

There were at the national dairy show in Chicago last fall two cows, Low Lande and Marie, that represent five generations of American breeding. The former was selected by the judge as the champion cow of the breed, and the latter had made a record for amount and economy of production at the Wisconsin experiment station. These cows have finer bone, the hind legs are less straight, their weight under 1,200 pounds, and in the view of many experts showed the highest dairy quality. They are good milkers and good cows, but to my mind they are not as typical representatives of the breed as the big, heavily boned, and quiet butted 1,500 pound cows that are imported and occasionally raised in this country and such as you find represented in large numbers in the stables of our country.

The normal weight of Low Lande, a cow of the Brown Swiss breed, is 1,500 pounds. With her second calf she gave within

Happenings in and Around Frank

J. Thompson, of Cranbrook, came to town on Sunday.

J. E. Woods and F. M. Steele, of Elsieher Creek, were in town on Tuesday.

W. M. Campbell, of Campbell & Fawcett, came up from Macleod on Tuesday.

W. T. Watson, brother of S. J. Watson, and W. Robson, both of Hosmer, were in town on Monday.

The large septic tank at the Rocky Mountain Sanatorium, has just been completed and is now in use.

A. A. Muller, general manager of the Canadian Coal Consolidated, went to Macleod on Monday and returned to town on Tuesday.

The Ruthven MacDonald party were well received at the Miners' Hall on Tuesday night and their production of music and talent brought forth the heartiest applause from the audience. Mr. MacDonald and Miss May Crawford have respectively beautiful baritone and soprano voices, while the character readings of Miss Mildred Gordon display no mean ability as an entertainer.

Pipes have been laid from the Rocky Mountain Sanatorium, with the exception of crossing the C. P. R. track, for which permission was given on Wednesday. A tank to contain five thousand gallons of water is being built about 200 feet up the mountain above the sulphur springs. This tank will receive water from the springs by means of an electrical centrifugal motor, and the water will be carried to the sanatorium by its own gravity.

Dr. and Mrs. Malcolmson and family left on Sunday evening for Edmonton where they will reside in future. Doctor Malcolmson has been a resident of Frank for many years, during which time he has well and faithfully attended to his numerous patients and at all times proving himself to be a physician and surgeon of no mean degree. Many of our citizens are sorry that Dr. Malcolmson has left Frank but their best wishes go out to him. Dr. McKay has charge of the hospital and Dr. Malcolmson's work here.

Calabash En Fete at Frank

On Wednesday night last the boys of the Calabash Club and friends waited upon A. J. McKinnon and tendered him a jovial surprise on the occasion of his proposed interesting undertaking. Among those present were Messrs. Bennett, Ayres and Dallas, Blairmore; Boudreau, Lessor, Rourke, Hughes, Thompson and Harrington, of the Calabash; and Milford, Scott, Clearhith, Naylor, Beach, Schours, Ryan, Ross, Sinclair, Houston, Rynas and McKinnon, of Frank. The programme consisted of voluntary speeches, interspersed with enticing refreshments. The speech of the evening was delivered by H. Murphy, who rose and in a pleasing and beaming manner congratulated the honoree guest of the evening. Among the other speakers were C. J. Tompkins, J. Naylor and S. Lessor, all of whom were much appreciated in their remarks.

The boys tendered Bro. McKinnon the hope for unlimited joy in the event which was to take place on the 25th, in which he would take unto himself a life partner. Singing and instrumental selections added largely to the pleasures of the evening and the happy gathering was dispersed in the wee sma' hours of Thursday morning.

Coleman Notes

Messrs. T. Haynes and McKim Hunter left Monday morning for Vancouver and other coast points.

J. W. Ashdown, hardware dealer of Winnipeg, who had been to the Pacific coast, paid Coleman a visit last week, returning east.

Rev. Mr. Hull, of Pincher Creek, was in town on Sunday and delivered an eloquent sermon to the Odd Fellows, in St. Alban's church in the afternoon.

The showing put up by the Odd-fellows on Sunday last was indeed creditable to this world-renowned society. Great credit is due Marshall Clark for his efficiency in conducting the parade.

Miss Mary Gie, who has spent several months at Merritt, B. C., is visiting the old home in Coleman. Rumor has it that Miss Gie is very shortly to be a partner in an event that will somewhat lighten the cares of Harry.

An error occurred in the account in last issue re the vocal contest held here, which in justice to the competitors we wish to make correct. First gentlemen's prize was won by W. B. Haynes second by T. Leshon and third by A. McMurdo.

The power plant is closed down and kerosene lamps are now being used. Many of our people have been put to a considerable expense on this account, and yet, this needless expense, to say nothing of the inconvenience, might have all been saved if a little good judgment had been displayed earlier. The words of Isaiah, son of Amos, "Darkness shall cover the earth and gross darkness, the people," are being plainly verified here just now.

Your tongue is coated.
Your breath is foul.
Headaches come and go.
These symptoms show that your stomach is the trouble. To remove the cause is the first thing, and Chamberlain's Stomach and Liver Tablets will do that. Easy to take and most effective. Sold by dealers everywhere.

Artificial Respiration

(A miner said at Westboughton that he remembered an occasion when a man was "gassed" at his working place. "Did you use artificial respiration?" he was asked. "Yes," was the reply. "I hit him on the jaw, and as soon as I did that he shouted, 'Hold on!'")

Suppose your Uncle Godfrey, say, should ever chance to swoon away, and would you rouse him from his faint, and make him quite as fresh as paint. Indulge in no prolonged harangue; That's not the way to bring him round; But seize him by the ears, and bang his head severely on the ground.

In cases, say, of sudden cramp, Don't wait until the doctor comes; But lay the patient down and stamp upon his fingers and his thumbs. Prostration is the thief.

Of time, so if for that you're pressed Asphyxian cases find relief If kicked with vigor in the chest.

Ice cream and refreshments will be served on the veranda or the inside of the Rocky Mountain Sanatorium every Wednesday and Sunday all day.

Every family and especially those who reside in the country should be provided at all times with a bottle of Chamberlain's Liniment. There is no telling when it may be wanted in case of any accident or emergency. It is most excellent in all cases of rheumatism, sprains and bruises. Sold by dealers everywhere.

Happenings in and Around Bellevue

V. Hawkins left for his ranch near Cowley on Tuesday.

T. M. Burnett is away from town for two or three weeks.

Mr. Anderson has returned from the teachers convention reporting splendid meetings, especially with the cousin in Calgary. The school re-opened on Monday.

On Monday there is to be a match between married men and single men, on the football field. Officers have been appointed for the season and a list of same will be given next week.

During the week, Dr. Mackenzie has been urging the householders to fumigate as a preventive to further spread of scarlet fever. The school and church have attended to this matter.

The scarlet fever epidemic makes haste slowly. One more patient has this week been added to the list, Miss Alice Carter. Mr. Lindsay and Mr. Livatt have retired to the jungle until the house is released.

The only competitor who went to the choral exhibition at Coleman last Monday week from Bellevue was V. Hawkins. The judge said that she had not found it possible to classify his voice, it was only heard in cathedrals. However, she gave him fourth place.

Some people are wondering how it is that there are so few victims of fevers. No attempt has been made towards sanitation in spite of efforts directed by agitators for months past. People have to throw their refuse on the ground and the house and the dog are greater in the spring, for the kindly breeze must carry away germs released after the thaw. Some time Bellevue will put on its beautiful garments, will have its mayor, council, etc. and all within will be clean.

Echoes From Passburg

J. Strachan is going into the livery business here, and has taken over the Passburg livery, near the Passburg hotel.

A bush fire to the north of Burnis attracted considerable attention here on Saturday afternoon. It is thought to have spread from a rancher's brush fire.

The strike has considerably hampered business here, but nevertheless everyone are making ready for a big rush when a settlement has arrived. Passburg today has taken on a growing appearance and we look forward to a short time hence when our anticipations will be fully realized.

Messrs. Tye and Heywood, blacksmiths and wheelwrights, have started to use the welder and its slag sets another chord of hope in our ears. At present they are doing business in a small shop about 15x25 feet, but propose to build a large place, which when completed will compare with any smithy's store in the Pass.

There is talk of a largely capitalized company proposing to erect a cement plant in Passburg, and already representatives have been looking over the grounds to locate the most suitable site. It is believed by them that an inexhaustible quantity of raw material for the manufacture of cement is lying in wait for the industrial drill and a new industry for Passburg is almost assured.
